REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The instant application discloses a method and apparatus for coherent phase synchronous CDMA communications between a gateway and multiple subscribers. A search of prior art records has failed to disclose a method for coherent phase synchronous CDMA communications between a gateway and multiple subscribers comprising the step of; "synchronizing a local reference clock for each subscriber in a service area to a single master reference clock wherein the distance separating the transponder platforms is within a range and wherein the local reference clocks for all subscribers have substantially the same clock phase with respect to the master reference clock and transmitting delayed CDMA message signals from the gateway to an intended subscriber via each of the multiple transponder platforms with respective delays so that the intended subscriber receives the message signals with different carrier signal phases" as discloses in claim 1. Neither does the prior art teach an apparatus for coherent phase synchronous CDMA communications between a gateway and multiple subscribers comprising; "a propagation parameter calculator for calculating message signal propagation parameters from the return link CDMA signals; and a "transmitter transmitting the synchronous CDMA message signals to an intended subscriber via each of the multiple transponder platforms with respective delays so that an intended subscriber receives the message with the same carrier signal phase and an unintended subscriber receives the message signals with different carrier signal phases" as disclosed in claim 12.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
